Dear Parent or Guardian:

May 17, 2021

As the parent/guardian of a child entering 6th grade please be aware that your child should have a **Tdap** immunization and a second **MMR** vaccine (if not already administered) prior to the start of the school year. Per **New York State Public Health Law** (section 2164), your child must have the immunization administered (verification of appointment no longer acceptable) within 14 days of the start of the school year.

Please be aware that if your child does not have the **Tdap** immunization before school starts he or she may not be allowed to continue in school, after the 14-day deadline expires until documentation of the shot is administered.

Please submit proof of your child's immunization to the school nurse. If you need assistance contacting your school nurse please call the school office, or the Health Related Services Department at the number below.

Thank you for your attention to this important health issue.
