

NETWORKING & HARDWARE PROGRAM OF STUDY

Program Description			Grade	Courses
Networking & Hardware	CTE Pathway	Students explore computer repair, troubleshooting, and support with an emphasis on the physical structures of computers and computer networks. Working in computer lab settings, students will work to solve real-world challenges to support the growing reliance on computer networks. Students in this program will be prepared to pursue careers in information technology, computer hardware repair, network and computer system administration, and cyber security.	9	Career and Financial Management
			10	Introduction to Computing 10
			11	Networking & Hardware 11
			12	Networking & Hardware 12
