

2

- I understood the problem completely and could explain it to someone else.
- I started a strategy and completed it.
- All of the arithmetic is correct.
- If I had to write or explain how I got my answer – my explanation was clear and made sense.
- If I drew a chart, picture or table – it was complete and correct.
- I labeled all of my work on the problem and circled my final answer.

1

- I partially understood the problem but didn't get it completely correct.
- I didn't get the right answer but I knew how to do the problem and showed my work.
- I got the correct answer but didn't show my work.

0

- I don't understand the problem.
- I showed no work.
- I'm totally lost.
- I made a lucky guess at the answer and gave an incorrect reason for the answer.
