

3

- I understood the problem completely and could explain it to someone else.
- I started a strategy and completed it.
- All of the arithmetic is correct.
- If I had to write or explain how I got my answer – my explanation was clear and made sense.
- If I drew a chart, picture or table – it was complete and correct.
- I labeled all of my work on the problem and circled my final answer.

2

- I partially understood the problem but didn't get it completely correct.
- I started a strategy and almost finished it.
- Most of the arithmetic is correct – I made one or two mistakes.
- When I wrote my explanation it was confusing and not clear – it didn't answer the question completely.
- When I drew a chart, picture or table it wasn't complete – I left some information out.
- I may have gotten the correct answer but my work wasn't complete.
- I was a bit confused at the end of the problem but I thought I knew how to start it.

1

- I really didn't understand how to solve the problem completely but I started to show the work.
- I got the right answer but I didn't show my work.
- I didn't write a clear explanation, or left it out totally.
- I didn't draw a chart, picture or table.
- I made a lot of arithmetic mistakes.
- I am confused.

0

- I don't understand the problem.
- I showed no work.
- I'm totally lost.
- I made a lucky guess at the answer and gave an incorrect reason for the answer.
