mdixon@buffaloschools.org

Date: July 3rd, 2018
To: Principals of Schools: 3, 30, 37, 74, 94, 97, 204, 205, 207, 208, 307, and 309
CC: Associate Superintendents of School Leadership
From: Office of School Leadership
Subject: Receivership Quarter 4 Survey

Commissioner's Regulations §100.19 require each school in Receivership to submit Quarterly Reports. The Quarter 4 report for schools in Receivership during the 2017-18 school year will consist of a brief, year-end summarizing survey which will require written responses.

Please see the following paragraphs below to understand the NYSED request:

Survey questions relate to the school's accomplishments and challenges in implementing Receivership, and ways in which the SED Office of Innovation can better support schools in the future. Please answer all questions as honestly, candidly, and professionally as possible. Your feedback will allow us to improve our service to your district and schools.

*We'd also like to take this opportunity to remind districts that have schools in Receivership during the 2018-19 school year, that it is a requirement of Commissioner's Regulations §100.19 to **conduct an annual Public Hearing (community meeting) "within 30 calendar days of the first day of student attendance in September 2018,"** for "discussing the performance of the designated school and the construct of Receivership."*

*Since this survey report serves as your Quarter 4 report, as per CR § 100.19, the school's completed survey must be made publicly available in the school district's offices and posted on the school district's website. **The Office of School Leadership (OSL) will post the survey results to the District website.***

Please submit this document to Diane Andreana (dandreana@buffaloschools.org) by end of business on **July 11th**. The Associate Superintendents of School Leadership will review responses and OSL will upload responses to SED. Questions 4, 5, 8, and 9 have a standard answer. If you would like to add additional information, please do so using **red** font color.

1. Respondent's credentials:

School District:	Buffalo City School District
Superintendent:	Dr. Kriner Cash
School Name:	Hamlin Park
School Principal Name:	Patrick Cook
School Principal Appointment Date:	10/27/2016

2. What are the accomplishments from the 2017-18 school year that you would like the community to know about your school?

- *Hamlin Park implemented a Response To Intervention block in response to school data resulting in targeted differentiated instruction for every leveled learner in ELA.*
- *Hamlin Park with the addition of a technology coach was able to provide training to both students and teachers in the use of one to one devices to assist in the differentiation of curriculum.*
- *Hamlin Park utilized technology to implement new pedagogies to meet the diverse needs of our students.*
- *Hamlin Park's ELITE team met bi-monthly to vertically align curriculum, share best practices, and to create a literacy based action plan.*
- *Hamlin Park is a school that practices and implements restorative practices as an alternative to suspension resulting in a reduction in both short and long-term suspensions by 50%.*
- *Hamlin Park's Average Daily Attendance (ADA) for the 2017-2018 school was 90.20%.*
- *Hamlin Park is a Community School averaging over 150 participants at Saturday Academy (leading the East Zone within the 4th Quarter).*

3. Which of this school's Demonstrable Improvement Indicators have been the most challenging to achieve, and what steps will be taken in 2018-19 to make Demonstrable Improvement on these indicators?

Indicator 3 – 8 Math Black Students Level 2 and Above has been challenge. As result we have implemented the following:

- *By end of 1st semester of 2018/19 school year, 75% of observed math lessons will follow the district curriculum with skilled fidelity. 95% of math teachers will have met with the math coach to set up coaching sessions based on their skill level with the district curriculum.*
- *Reconfigured the schedule to provide additional supports such as school wide RTI Math Blocks.*

- *Grade level Professional Development around modules and concept development.*
- *Departmentalizing to utilize the strengths of the teachers content knowledge in grades 4th – 8th.*

4. Did the Superintendent use their receivership authority in the 2017-18 school year? If so, how? OSL has completed this section. The powers below were invoked by schools in 2017-18.

Yes **No**

Right to mandate faculty meetings twice per month; meetings held either before or after school hours and would be 60 minutes in duration; teachers receive hourly rate of pay.

Discretion and ability to require teachers to use all technological tools necessary and appropriate to more effectively communicate with students and parents; district will provide training where needed.

Discretion and ability to modify schedule at any time to add more common planning time.

Ability to fill vacancies through the transfer process with the most qualified teacher, regardless of seniority.

Right to require that teachers attend professional development (PD) (based on the needs of the school) the receiver deems necessary; 30 days' advance notice to teachers; PD will be offered more than once if it is after the school day/school year; teachers will receive additional compensation if PD is after school day/school year.

Ability to fill vacancies in summer school, recreational or part time programs with the most qualified teacher, regardless of seniority.

Discretion and ability at any time and for any reason to involuntarily transfer teachers out of persistently struggling schools regardless of seniority or status as building union delegate.

5. Is your district interested in presenting a best practice at the second Promising Practices conference? OSL has completed this section. Below are the best practices from each quarterly report. Please add more if you would like. This does not commit your school to presenting at the Promising Practices conference.

Yes **No**

Ongoing feedback to teachers regarding their DOK lessons and instruction: The leadership team uses Dr. Karina Hess' Cognitive Rigor Matrices to analyze lesson plans and instructions. The matrices crosses Bloom's Taxonomy with Webb's Depth of Knowledge.

The team uses Google forms to document DOK lesson plans and lesson. There are three types of forms – Writing, Reading, and math. Once the information is submitted, a spreadsheet can be generated. We use the spreadsheet to look for trends in DOK levels.

Teachers receive weekly feedback from lesson plan submission regarding DOK instruction and task alignment to levels of DOK.

Infusing the Use of IXL Math into grades 3 – 8 Instruction: Students in grades 3-8 have been using IXL Math during their Math RtI and AIS periods. Students also practice IXL at home on laptops provided through the technology pilot program. To determine the overall impact on student performance, student usage reports since the initiation of the program have been analyzed. Between October 31, 2017 and April 18, 2018, students accessed IXL Math for 1,389 hours and 53 minutes. Students showed mastery in 1,321 skills. The anticipated outcome for the daily use of IXL Math is that mastery of student mathematical skills will show continued improvement as evidenced in student performance on Math assessments. The use of IXL Math has positively supplemented daily instruction as teachers have the ability to assign individual students with differentiated practice skills to close mathematical gaps. This model can be effectively replicated in different schools depending on the allocation of time in the Math RtI or AIS periods and the availability of technology for student use.

Data Driven Inquiry: Data driven inquiry has been implemented during grade level and faculty meetings. All educators at School 74 have received professional development and ongoing support in the DDI process from our partner, REACH, LLC., and the Early Intervention Program Coordinator. Teachers are using an ongoing analysis of student achievement data to determine the need for changes in instruction and identification of necessary interventions for students.

The Using Data Process (DDI protocol): The Using Data Process of Collaborative Inquiry (Using Data Process) offers a structured process for ongoing investigation of data with the goal of improving teaching and learning. The professional development is based on the book written by Nancy Love, Stiles, Mundry and DiRanna, "Unleashing the Power of Collaborative Inquiry, the Data Coach's Guide." The professional development addresses the critical achievement crisis as described in the background by building the knowledge and skills of Data Coaches-grade level leaders and administrators- specially trained to guide the use of data—to lead Data Teams in collaborative inquiry.

Collaborative inquiry is a process where teachers and administrators work together in Data Teams to make sense of student learning and other data and embrace and test out solutions together through rigorous use of data and ongoing reflective dialogue. Through the Using Data Process, Data Teams become vital centers of collaboration, meeting regularly to engage in Data-Driven Dialogue. Data Driven Dialogue is based on four phases: predicting, going visual with the data, observing the data and making inferences. Through inference teachers brainstorm what may work in their classrooms. The Data Teams use multiple data sources, including common and formative assessments, to make

critical, research-based instructional improvements and to monitor their impact. These improvements and ongoing monitoring of student learning are the final and necessary step to improve results for students. In sum, the purpose of the Using Data Process is to guide Data Teams in collaborative inquiry and to influence the culture of schools to be one in which data are used continuously, collaboratively, and effectively to improve teaching and learning.

Building Teacher Leaders through Modeling: Teachers modeling best practice strategies during grade levels and scheduling times for teachers to view other teachers in action as they model strategies that work for students. This, again, allows for best practices to sustain throughout the building when funding ceases.

Action Plan for individual student growth in math and ELA based on assessment data: The inquiry cycle of DDI includes assessment, analysis, and creating an action plan for school-wide support of all students' success.

The first component is matching high quality intervention through learning areas that are matched to student's educational and behavioral needs. Second, progress monitoring is used to assess the need for changes in instruction or goals. Third, student responses from progress monitoring data is the basis of important educational decisions, which include additional levels or tiers of instructional support.

Video POD cycle: In the Video POD cycle, teachers participate in a discussion about the planning of the observed teacher, view and make observations about the lesson, then debrief to share feedback with the observed teacher as well as a discussion of how the observed practices can be implemented throughout content areas. Doing so allows for the observed teacher to further improve their practice, and for all other teachers to incorporate best practices throughout the building into their instruction to improve student achievement. The Video POD cycle allows teachers to share and analyze best practices with grade level teams and throughout the building to improve all teachers' instructional practices. This process has been further developed by the use of Video Ant. This program allows teachers to upload their videos onto the site securely. Teachers then share the link with the members of their team, and the team members can provide minute by minute feedback to teacher on their instruction on the site.

SMART goals: SMART goals have been developed by teachers to individualize instruction. Teachers have used these individual student SMART goals to have conversations with students for them to be able to create student goals so that students can be able to self-monitor their progress. These goals are to be looked at every six weeks, and adjusted as needed to help students achieve their individualized SMART goals for the school year.

Grade level facilitators: We have designated teachers at each grade level, as well as ENL, Special Area and Special Education teachers, as teacher leaders in the building. These teachers have monthly training sessions with our consultant agency West Ed in order to learn how to successfully run grade level meetings and the multiple protocols our building has adopted in order to close the gap and increase student achievement. This quarter, facilitators were all given the opportunity under the supervision of West Ed to run multiple protocol sessions with their team members during a mandatory West Hertel PD session. Our West Ed consultant gave an overview of each protocol, and then

teachers were released to work in groups in order to complete multiple protocols based on each group's needs. Facilitators had the chance to run these meetings and ask our consultant for assistance as needed in order to build confidence in their leadership skill, and increase building capacity to continue this work next year.

6. Summarize the trends in student achievement data that has resulted from the implementation of the SCEP or SIG plan. What has improved, and what has not?

Hamlin Park's data in ELA indicates that we are making progress in all grades school wide. As a result, to continue building teacher capacity and improve student achievement, adjustments will be made to the master schedule. These changes will include adaptations to the ELA block to allow for the efficient use of personnel to provide Response to Intervention (RTI). RTI will be explicit with a focus on re-teaching and pre-teaching concepts. Response to Intervention will be based on formative and summative assessments and flexible in nature. Additionally, the master schedule will provide more opportunity for teachers to collaborate during their scheduled planning cycle. This time will be used for modification of the curriculum, common planning, and to increase enrichment opportunities provided to students across the school.

Hamlin Park's data in Math indicates that we are making progress in grades 3rd – 5th. However, according to the District Based Assessments, personnel and resources were reallocated to address the gaps for grades 6-8. The math coach will model how to adapt the modules to meet the needs of all students. Backwards planning will continue during grade level and common planning meetings. Grade levels and common planning will be supported by the math coach. The teachers will use grade level meetings time to discuss and share their analysis of student achievement data.

7. Describe the role on the Community Engagement Team in the development and oversight of the implementation of the school's improvement plan. Describe any actions that will be taken to enhance the ability of the Community Engagement Team to support improvement in student achievement.

The Community Engagement Team (CET) members have continued to meet monthly to discuss various areas of the receivership plan, its implementation and monitoring. During these meetings, the team, which consists of several classroom teachers, a parent advocate, and two community members, discussed the social-emotional initiative, CHARACTER COUNTS!. This program, which is utilized in conjunction with PBIS, was introduced as a means of creating an inviting climate, Receivership, Quarter 4 Survey

cultivating leadership, improving instruction, and managing people, data and processes to foster school improvement.

Based on the Diagnostic Tool for School and District Effectiveness (DTSDE), several recommendations regarding family and community engagement will serve as the basis for our CET in the 2018-2019 school year.

First, school leaders and SST will research and employ multiple modes of communication that are reciprocal in nature and ensure all parents feel informed, empowered and welcome to participate in the instructional well-being of their child. School leaders will monitor this through monthly communication logs, DOJO, and event sign in sheets.

Second, school leaders and SST will establish academic and behavioral protocols to turnkey to parents that will improve the home-school connection. This will include student data in ways that promote dialogue among parents, students and community members that emphasizes student learning and empowers families to understand and use data to advocate for appropriate support services for their children.

8. In what ways has the Office of Innovation and School Reform (OISR) been supportive of your school improvement efforts?

Quick response from OISR with respect to amendments has allowed schools to expedite spending in a timelier fashion.

Feedback from the local SED team on quarterly reports helped to focus on ELT monitoring for quality programming.

9. In what ways can OISR better serve your district/school's goals?

In order to implement feedback, timely review of quarterly reports, better planning with respect to visits within the academic calendar year, and monitoring by OISR on subsequent visits would be beneficial.

10. Survey prepared by:

Patrick Cook

11. Survey Approved by (ASL):
