

Welcome to Pre-K

Welcome to Pre-K 2021-2022! We look forward to having a wonderful school year with your child. We believe in providing a caring, well structured environment for each child. We are here to help each child grow and have a wonderful school year both academically and socially.

We would like to provide a quick overview of the Pre-K curriculum. Our focus is on developing pre-literacy and math skills. In Pre-K we work on learning our letter sounds and letter formation. Through reading we build vocabulary and focus on reading comprehension skills. In Pre-K we use the Scholastic "Big Day for Pre-K" reading series. It is comprised of 8 different themes. We use a fun and interactive math program called "Building Blocks". Children can explore numbers, shapes, counting and real-life problem-solving skills.

Your child will have a "Take Home" folder that will go back and forth from school to home every day. The "Take Home" folder and ClassDojo (an online resource) will be used to communicate with families. Please don't hesitate to contact us through ClassDojo, or by phone, or email. ClassDojo is the BEST way to communicate.

If you haven't done so already, please begin to practice having your child wear his/her mask for longer periods of time. This way your child will be used to wearing a mask when we start classes at school. (As of June 2021, we are still wearing masks all day in school.)

We look forward to working together as a TEAM to bring out your child's highest potential, not to mention have some fun and make some memories!!!

Sincerely,

The Pre-K Teachers
