The Math, Science and Technology Preparatory School Opened in September of 2006

*Pamela D. Rutland
Principal*

A history making partnership with the University of Buffalo provides our students with opportunities to excel in Science.

- Summer academic institutes for students on the University of Buffalo's Campus.
- Fellowships for instructional faculty to continue their studies.
- Saturday Academies give students the opportunities to work with professors and graduate assistants.

A collaborative learning environment ensures that all children reach their full potential.

The commitment from our Superintendent, the College Board, our Parents, Faculty, Staff and administration make our school one of a kind.

College Board Schools are staffed by outstanding professionals who create rich instructional environments in their classrooms.

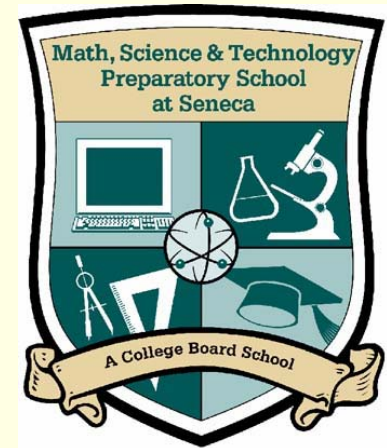

Our approach to education is just as unique as our students.

Sixth grade students study a unit on Pre-historic Art.

Providing students with equitable access to a quality education.

- A rigorous college preparatory program is the foundation of the courses offered.
- Students accepted in grades 6 and 9, upon entrance, are given diagnostic assessments to gauge their academic readiness.
- A rich offering of extra-curricular activities and clubs provide students with the opportunity and structure to develop and build upon the social, organizational, academic and public speaking skills that are vital to their success in the 21st century.
- Each student is issued a Laptop computer. Wireless access to the internet is available to the students while in school.
- Curriculum, assessment and instruction are all aligned to the NYS Learning Standards with the emphasis on college entrance and success.
- Students begin the process of college exploration in grade 6.

The blend of individual instruction, hands on experiments and high expectations prepare our students for college.

- MST has state of the art Science labs and a rich partnership with the University of Buffalo translates into a Science program which creates a foundation.

MST provides students with support, materials, individualized instruction to be successful.

- An extended day provides our students with the additional support needed to close academic gaps and excel.

The College Board's 'College Ed' Program

- Starting in 6th grade students begin to learn the importance of a college education.
- This program continues right through commencement in 12th grade.
- This is accomplished through education provided by our school counselors.
- Also students regularly visit colleges in order to get a sense of belonging and the feeling that they can succeed in post-secondary education.

Our mission is to ensure that students get to the college of their choice with the academic skills to succeed.

Sixth grade students were instructed by Erie Community College professors for a day.

Students were lead by University at Buffalo students, highlighting what the university has to offer.

Students are encouraged to work hard, play fair and give back to their community!

MST Students accepted an invitation to attend the announcement of the Governor's Contract for Excellence
