

Are you looking for a high level science and math college preparatory program?

Buffalo's newest high school Research Laboratory Program of Bioinformatics & Life Sciences may be for you!

As part of the Superintendent's *New Educational Bargain*, The Research Laboratory Program for Bioinformatics & Life Sciences @ MST opened in September 2016 an a new, innovative high school.

- The program is designed for students who are interested in careers related to medical research and the medical field
- The program is designed for small cohorts of 50 students per grade level; we will expand to grade 9 and 10 in school year 2017 – 2018
- We are looking for highly motivated students who enjoy science and math
- We are also looking for male and female students from **ALL** backgrounds
- We are currently partnering with the University at Buffalo
- The high school program will allow you to experience science research in the classroom, in the Buffalo medical community and globally through technology
- We have state of the art 3-D computers in our Z-Space lab and 1:1 laptop devices for all students
