

**READSPEAKER is a text to speech tool that highlights text while reading it aloud.**

**TEACHER PREVIEW**

You can preview the ReadSpeaker usability on any Castle Learning question in two ways:

1. Once you have added questions to an assignment, the ReadSpeaker icon will appear on the bottom right of the question. To preview, click on the play button.

2. You can self-assign to yourself and view the question as a student would. When you use this option, you can preview ReadSpeaker on the hint, reason or vocabulary words. As before, the ReadSpeaker icon will appear below the text to be read.

**CHANGING SETTINGS**

Teachers and students can change the ReadSpeaker settings by first clicking the play button and then choosing the settings button. You can change the highlighting options (color and amount to be highlighted) and reading options (speed).

**DISABLING READSPEAKER**

If you do not want an assignment to include the ReadSpeaker option, you must disable it when assigning to students. Otherwise, the ReadSpeaker option is the default on all assignments. You will find this under "Assignment Settings" when using the "Assign to Students" or "Quick Assign" options.
